

Kapil Jadhav

Senior Project Engineer — Battery Storage Systems (BESS)

Munich, Germany | kapil.jadhav0206@gmail.com | +49 15739041017 | linkedin.com/in/kapil-jadhav-0206

PROFILE

5+ years in the energy sector, leading utility-scale BESS projects across Europe end-to-end — from concept design and permitting through procurement, commissioning, and post-COD performance. Acts as primary technical interface with EPCs, suppliers, and clients; prepares and reviews project drawings and specifications; coordinates permitting with municipalities and grid operators (DSOs/TSOs). Background in product management and an MSc in Sustainable Energy Systems.

EXPERIENCE

Senior Project Engineer, Battery Storage

05/2024 — Present

BayWa r.e. · Germany

- Own the full technical lifecycle of utility-scale BESS projects across the EU — concept design, procurement, permitting, construction, commissioning, and post-COD performance.
- Act as primary technical interface with EPCs, suppliers, and clients, driving specifications, FAT/SAT, and commissioning acceptance.
- Drive value engineering decisions that optimise CapEx, efficiency, availability, and customer satisfaction.
- Lead design reviews against technical standards, manage supplier qualification, risk, and project KPIs.
- Enabled the sale of ~400 MWh of BESS projects through techno-economic input.

Team Lead — Senior Product Manager

06/2022 — 04/2024

Sungrow Europe · Germany

- Led a team of 5–7 solution engineers, supervising activities and managing stakeholders across the region.
- Delivered system designs and technical proposals for large-scale storage and hybrid projects throughout Europe.
- Managed tendering and negotiation — specifications, supplier selection, and contracting for battery storage plant.
- Built the ESS product roadmap, region-wise MOQ strategy, and compliance alignment with technical standards and regulations.
- Provided proposals for >1 GWh of projects and signed >200 MWh within a year.
- Recognised with Sunrise Star 2022 and Best Team Q4 2022 awards; represented the company at customer sites and industry events.

Research & Development Engineer

12/2020 — 05/2022

RWE · Germany

- Designed BESS configurations with varied degradation profiles, augmentation strategies, and pricing roadmaps.
- Validated sizing and CapEx algorithms, including a salvage value estimation tool.

Earlier career: Electrical Engineer (GAT), CG Power and Industrial Solutions Ltd., India (08/2017 – 08/2018) — graduate apprenticeship in electrical systems and industrial equipment.

SKILLS

Technical

BESS design & sizing
Project delivery & lifecycle management
Compliance & technical documentation
Permitting & grid coordination

Leadership

Team leadership (5–7 engineers)
Stakeholder & supplier management
Performance optimisation

Languages

English — fluent
German — working proficiency

Tools & Software: PowerFactory, PVsyst, Python, MS Project, JIRA, Git, MS Office, AutoCAD, Visio

EDUCATION

MSc Engineering — Sustainable Energy Systems

10/2019 — 06/2022

University of Applied Sciences Upper Austria

BEng — Electrical Engineering

06/2013 — 05/2017

University of Pune, India

Certifications: Project Cost Management, Estimating, Budgeting and Control (Udemy) | Business Analysis and Strategy Analysis — ECBA (IIBA)

PROJECTS & RESEARCH

- Research on second-life batteries: market developments, existing companies, and legal framework.
- Feasibility study of a 16 MW solar power plant — Finland.
- Seminar paper analysing the German energy market.
- Transmission grid analysis of the Austrian power grid.
